

Cont A3
is provided with a means for impressing direct current or
alternating current power.

Please add the following:

A4
8. The semiconductor manufacturing apparatus according to
Claim 2, wherein said vacuum vessel can be divided into a part
including said processing chamber and a part having said
substrate transport mechanism.

9. The semiconductor manufacturing apparatus according to
Claim 2 comprising a plasma generation mechanism for generating
plasma in said processing chamber.

10. The semiconductor manufacturing apparatus according to
Claim 3 comprising a plasma generation mechanism for generating
plasma in said processing chamber.

11. The semiconductor manufacturing apparatus according to
Claim 10, wherein said plasma generation mechanism radiates
microwave thorough a slot antenna.

IN THE ABSTRACT

A5
Please delete the abstract on file and replace it with the
attached ABSTRACT OF THE DISCLOSURE.

Respectfully submitted,

Randall J. Knuth
Registration No. 34,644

1. The first step is to identify the problem or question that needs to be addressed. This involves understanding the context and the specific requirements of the task.

2. Next, it is important to gather relevant information and data. This can be done through research, consultation with experts, or by analyzing existing resources.

3. Once the information is gathered, the next step is to develop a plan or strategy. This involves breaking down the problem into smaller, manageable parts and determining the best approach to solve each part.

4. After the plan is developed, the next step is to implement the solution. This involves putting the plan into action and monitoring the progress to ensure that the solution is effective.

5. Finally, it is important to evaluate the results of the solution. This involves comparing the actual outcomes with the expected results and identifying any areas for improvement.
